

## Statistics of abortion in Romania and around the world

**VERY IMPORTANT:** These statistics do not include abortions made in private clinics and in some of Romania's state hospitals which do not report these data; they do not include chemical abortions (induced by pills); they do not include abortions in pregnant Romanian women working abroad (most of them of fertile age); they do not include illegal abortions and elective abortions registered as pregnancy losses. If all these were registered by the official statistics, they would probably lead to twice as many abortions compared to the current official data.

Since 1958, the year when elective abortion was legalized in Romania, abortion incidence has been higher than in Western countries, regardless of Romania's political regime and regardless of the abortion law in force! There were:

- 7,521,100 abortions when the procedure was not regulated: 1958–1966 (9 years);
- 7,298,402 legal abortions during the restriction period: 1967–1989 (24 years);
- 8,139,582 abortions after the elimination of restrictions: 1990–2020 (30 years).
- Romania ranks second in the world in terms of ratio between the historical number of abortions and current population number – Russia occupies the first place; the national average in Romania is of three abortions for each woman, while in Western countries this average is one abortion per woman at most.

### 1. Abortions in Romania between 1958–2020

Year	Number of abortions	No. of children born alive <sup>[3]</sup>	Pregnancies	Abortion percentage	Birth percentage	Graphic representation
1958	112,100 <sup>[1]</sup>	390,500	502,600	22%	78%	
1959	578,000 <sup>[1]</sup>	368,007	946,007	61%	39%

<sup>[1]</sup> Summary of Reported Abortions Worldwide, through August 2015, compiled by Wm. Robert Johnston, online at <http://www.johnstonsarchive.net/policy/abortion/#BS>.

<sup>[2]</sup> Current world population, 2017 estimates based on “United Nations, Department of Economic and Social Affairs, Population Division (2015). World Population Prospects: The 2015 Revision”, online at <https://esa.un.org/unpd/wpp/Download/Standard/Population/>.

## Victims of war vs. victims of abortion

If we open the history books, we read about times of great losses in terms of human lives, which saddened the world over the course of history – especially during wars. But pain, fear, uncertainty, traumas marked many more lives – not just at times of war, but also during peace. All these books never mention the millions of women left alone in their pregnancy crises by lack of support and how they went through the trauma of abortion. They suffered, their never-born children suffered, the fathers of these children suffered, their siblings, their grandparents and the whole society suffered by taking part in this lack of support for mothers and children. Let's talk about this suffering which, although not noted in history books, has significantly impacted in certain periods of history a great number of people and many generations. Let's offer support to women in pregnancy crisis and to preborn children, because we have the power to do more for life.

**No. of Romanians dead in the Independence War: 4,300**

**No. of Romanians dead in World War I: 1,125,000**

**No. of Romanians dead in World War II: 833,000**

**No. of abortions in Romania between 1958 and 2020: 23,048,862**
